

الركائز لطلاء المعادن ALRAKAEZ METAL COATING

Precision powder coating.
Finished to last.

STEEL · IRON · ALUMINIUM | DAMMAM · SAUDI ARABIA

01 About Us

Alrakaez Metal Coating is a newly established Saudi company specialising in powder coating, based in Dammam in the Eastern Province. We give steel, iron and aluminium a durable, even finish that protects the metal and looks good doing it, using modern electrostatic spray equipment and temperature-controlled curing ovens.

We started from a simple idea: every part that leaves our line deserves the same care as the project it belongs to. Whether you send us a single piece or a full production run, each item is prepared, coated, cured and inspected to the same standard.

Our name means “the pillars”. We aim to be one of the pillars your projects stand on.

02 Vision & Mission

VISION

To be the most trusted name in metal finishing in the Eastern Province, with quality that holds up in the Gulf climate.

MISSION

To protect and beautify metal with powder-coated finishes delivered on time and to specification, through skilled people, modern equipment and disciplined quality control.

03 Our Values

01

Quality First

Every piece is inspected before it leaves our facility.

02

Reliability

We commit to delivery dates and keep them.

03

Precision

Controlled preparation, spraying and curing.

04

Safety & Environment

Solvent-free powders and safe work practices.

05

Partnership

Clear, honest communication with every client.

WHY POWDER COATING

A finish that protects as well as it looks.

04 Why Powder Coating

Powder coating is a dry finishing process. Finely ground particles of pigment and resin are charged electrostatically and sprayed onto the metal, then cured in an oven, where they melt and flow into a hard, continuous film.

01

Tough & Long-Lasting

A hard, cured film that resists chipping, scratches and wear.

02

Corrosion Protection

A continuous barrier against moisture, salt and coastal humidity.

03

Sun & Heat Resistant

With the right outdoor-grade powder, colour stays stable under strong sun.

04

Environmentally Responsible

Virtually no solvents or VOCs, and overspray can be recovered.

05

Even, Clean Finish

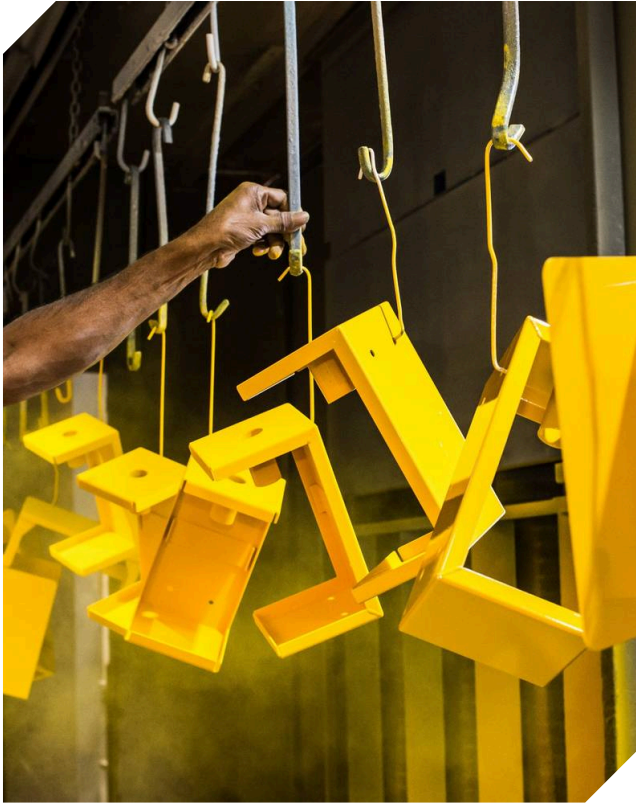

Uniform thickness and clean edges, with no drips or runs.

06

Cost-Effective

Less maintenance and a longer service life.

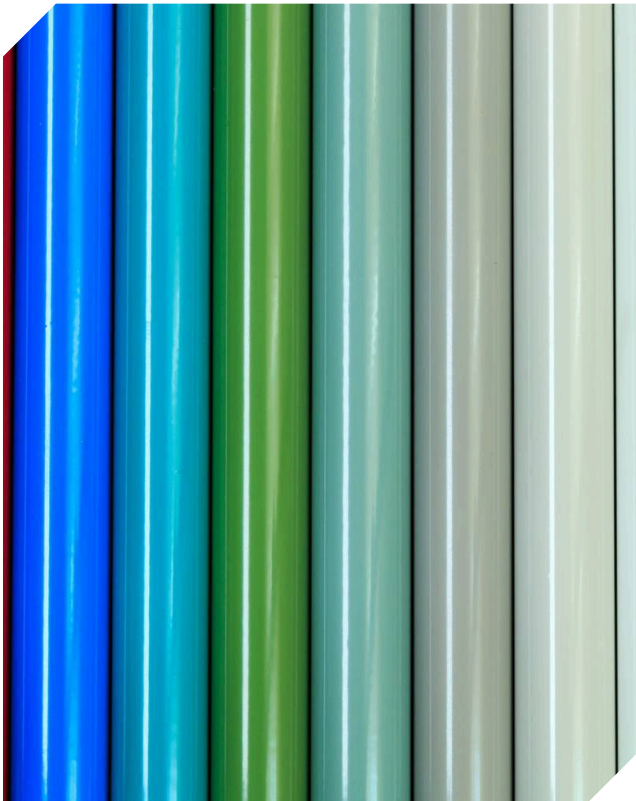

05 Our Services

SERVICE 01

Steel & Iron Powder Coating

Durable protective and decorative finishes for fabricated steel and iron: gates, fences, railings, structural members, brackets, enclosures, furniture frames and machine parts.

SERVICE 02

Aluminium Powder Coating

Clean, consistent architectural finishes for window and door profiles, curtain-wall sections, cladding panels, louvres and shopfront systems.

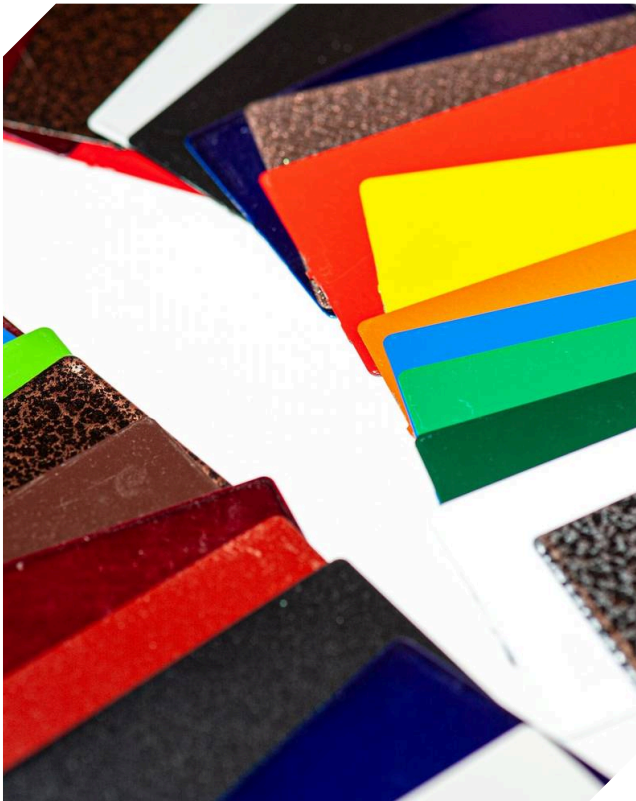

05 Our Services

SERVICE 03

Surface Preparation

Good coating starts with good preparation. We remove rust, mill scale, oil and old coatings through abrasive blasting, degreasing and pretreatment, giving the powder the best possible grip.

SERVICE 04

Colour Matching & Special Finishes

Choose from the RAL colour range in matte, satin or gloss, or go for textured and metallic effects. Send us a sample and we will help you find the closest match.

06 Our Process

01 Receiving & Inspection

We check every part, confirm the colour and finish, and plan any masking.

02 Surface Preparation

Abrasive blasting and degreasing down to clean metal.

03 Pretreatment & Drying

Chemical pretreatment for adhesion and corrosion resistance, then drying.

04 Powder Application

Electrostatic spraying for an even coat, including edges and corners.

05 Oven Curing

Baked at a controlled temperature until the powder forms a hard, continuous film.

06 Quality Check & Packing

Thickness, adhesion and appearance checks, then careful wrapping for delivery.

07 Colours & Finishes

Your finish is part of your design. We work with the full RAL colour range and a choice of gloss levels and textures, so architects, fabricators and manufacturers can specify exactly what they need.

01 **Matte**

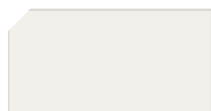

02 **Satin / Semi-gloss**

03 **High Gloss**

04 **Textured**

05 **Metallic**

06 **Custom RAL Colours**

RAL 9016

RAL 9005

RAL 7016

RAL 1015

RAL 8017

RAL 5010

Swatches are indicative only; printed colours vary. Please confirm against a physical RAL sample.

08 Quality Control

We check quality at every stage, not only at the end. Each batch is inspected against the agreed colour, finish and film thickness before it is released.

01 Dry film thickness measurement

02 Cross-hatch adhesion testing

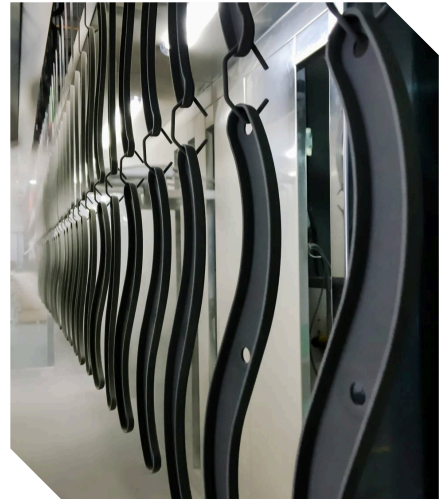

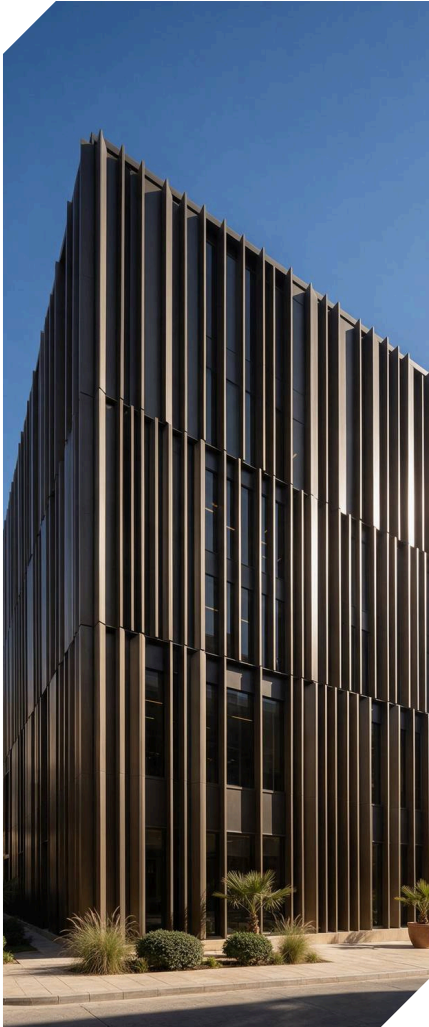

03 Gloss and colour verification

04 Cure verification

05 Visual inspection under good light

06 Protective packing and handling

09 Industries We Serve

01 Construction & Architecture

Gates, fences, handrails, canopies

02 Steel Fabrication

Beams, frames, brackets, platforms

03 Aluminium Windows & Façades

Profiles, cladding, louvres

04 Industrial Facilities

Enclosures, cabinets, equipment parts

05 Furniture & Fixtures

Office, outdoor and shop fittings

06 Infrastructure & Municipal

Light poles, barriers, street furniture

10 Why Alrakaez

01 Modern Equipment

Electrostatic application and controlled oven curing.

02 Local & Responsive

Based in Dammam, close to the region's industrial base.

03 Any Order Size

From a single piece to full production runs.

04 On-Time Delivery

Realistic schedules that we keep.

05 Clear Communication

One point of contact from quotation to delivery.

06 Care in Handling

Finished parts stay protected until they reach you.

Proud to support local manufacturing and industrial growth, in line with **Saudi Vision 2030**.

Let's talk about your next project.
